这是一个Peter的故事

Jul 5, 2015 – Dec 26, 2015

Contributions: **Commits** ▾

Contributions to master, excluding merge commits

The figure is a GitHub commit activity chart for user `cgcbc`. It displays the number of commits over time, with a secondary y-axis representing the count of changes (plus and minus signs). The x-axis shows months from August to December. Two orange bell-shaped curves represent the distribution of commit counts. The first peak in August reaches approximately 35 commits, with a secondary smaller peak around 25. The second peak in December reaches approximately 25 commits, with a secondary smaller peak around 20. The chart includes horizontal grid lines at 20 and 40 on the right y-axis.

cgcbc
279 commits / 27,750 ++ / 12,935 --

#1

HaoyuHu #2

159 commits / 18,342 ++ / 3,952 --

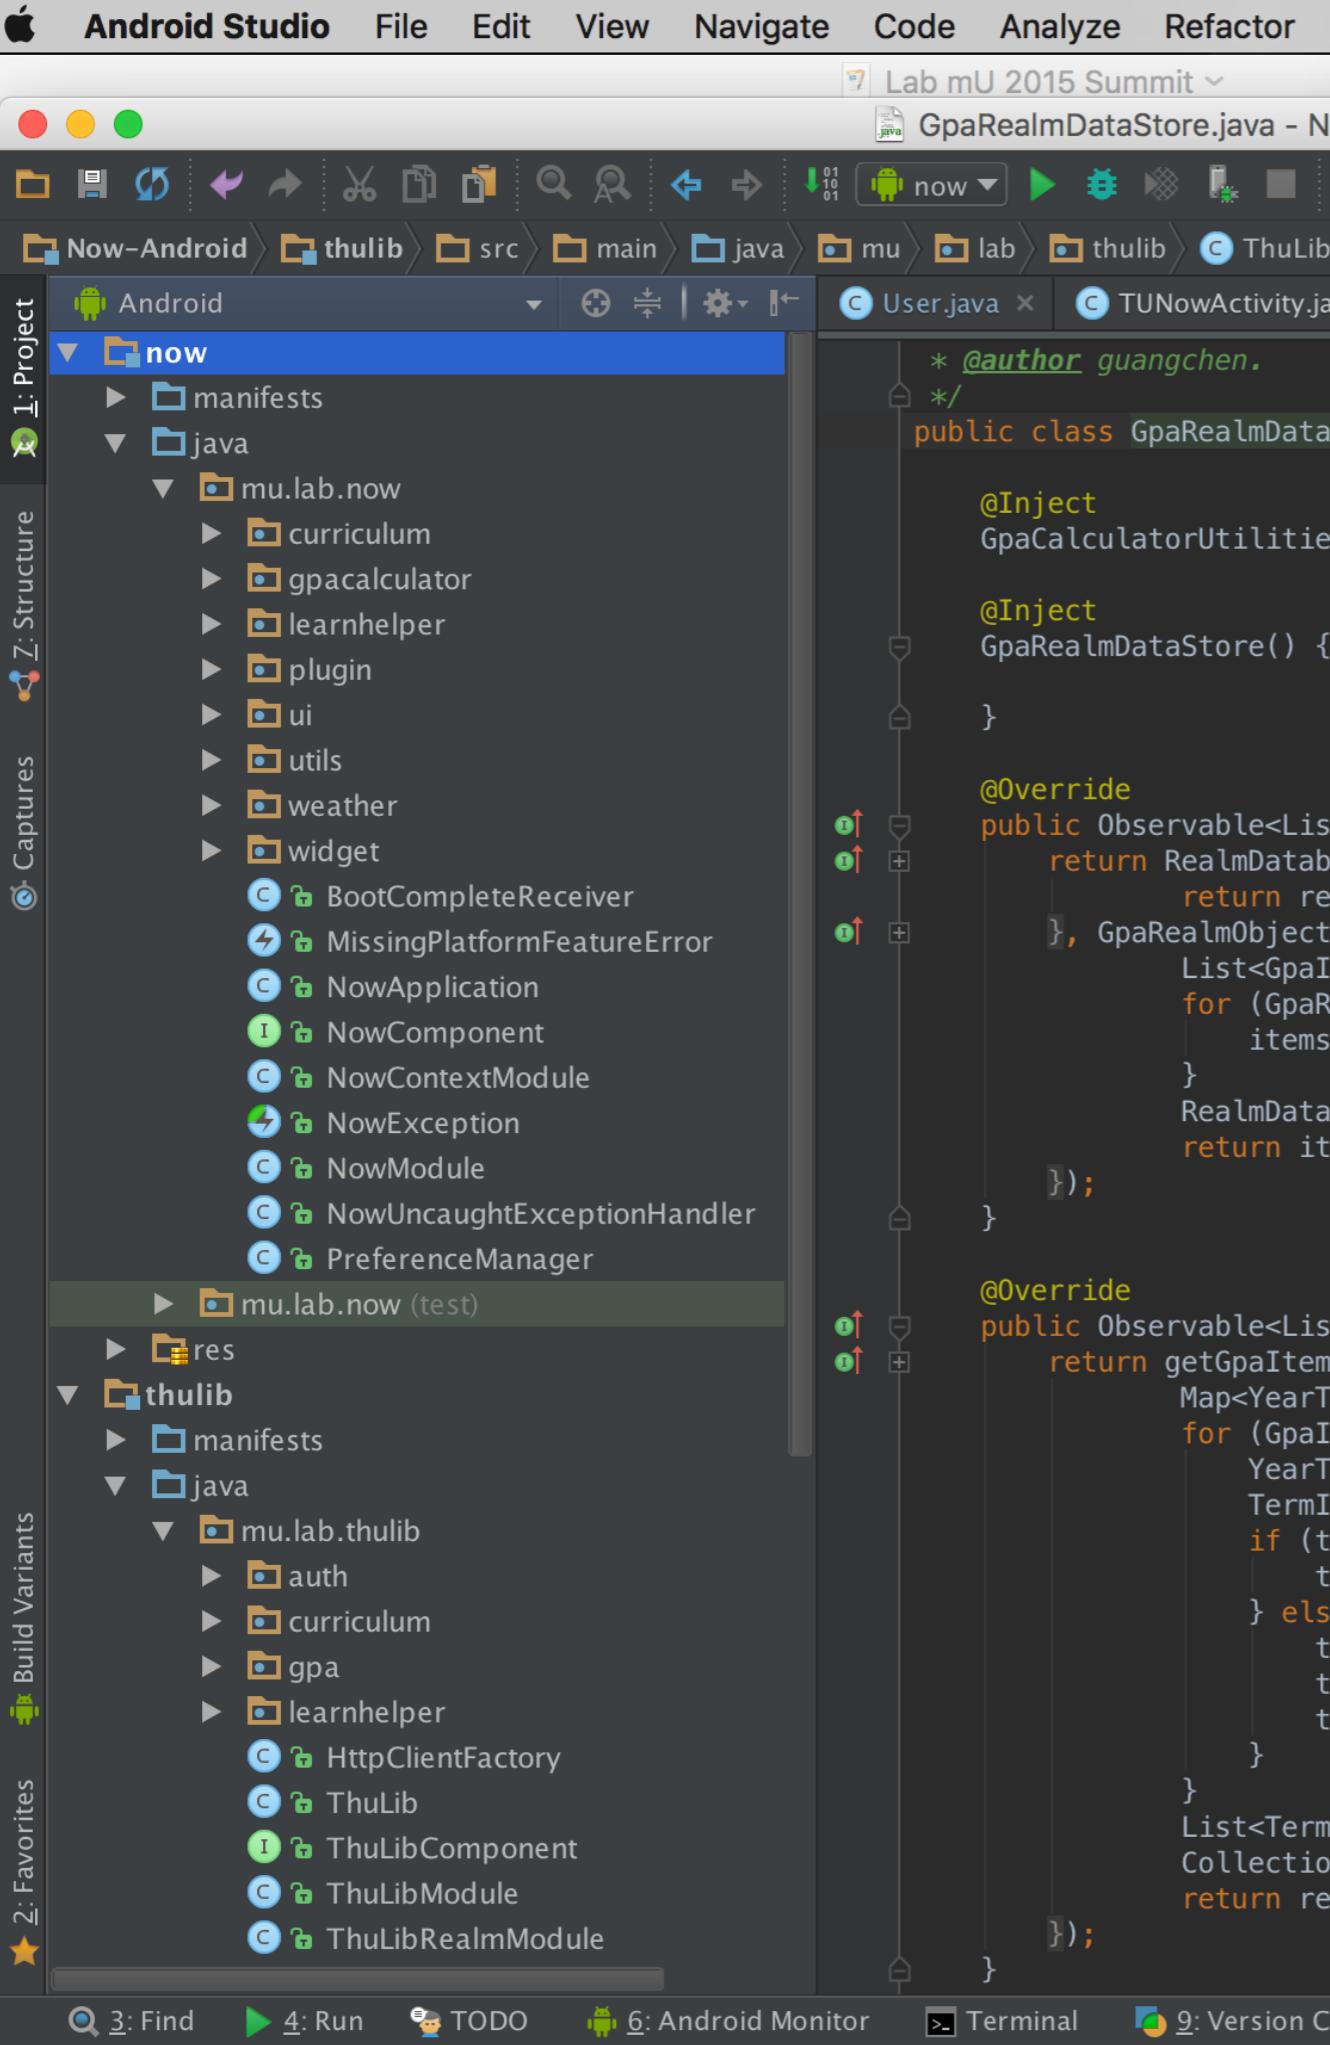

Date	Commits
August	~25
October	~25
December	~25

Hubertzhang #4

75 commits / 8,643 ++ / 4,620 --

The chart displays commit activity over time. The y-axis represents the number of commits, with major ticks at 0, 20, and 40. The x-axis shows months: August, October, and December. Commit activity is represented by orange areas. There are three distinct peaks: one in early September reaching approximately 15 commits, another in mid-October reaching approximately 18 commits, and a third in late November/early December reaching approximately 20 commits.

	yexithu	#5
	5 commits / 273 ++ / 81 --
